**Gold Medal MTP 2014
Mobile Trommel Screen
MPB 18.47**

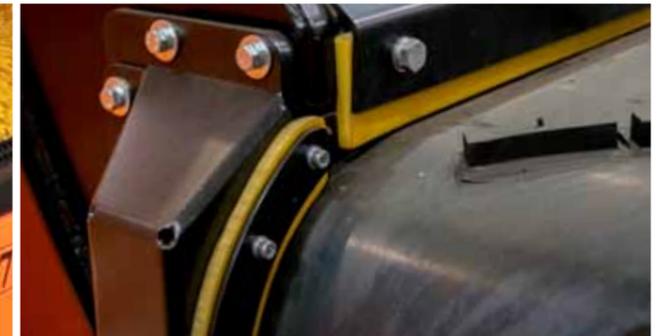

Mobile trommel screens are used for effective material separating into different size fractions.

Thanks to solid construction and simple principle of operation mobile trommel screens are perfectly suited for work with many different materials - municipal waste, wood waste and chips, compost, biomass, coal, soil, gravel, aggregates etc. Four available sizes allow to fit machine according to the task. Replacable drums can be made according to customers needs - thickness adequate to- the material and hole size for separating the required fraction.

Hydraulically raised and lowered trommel cleaning brush

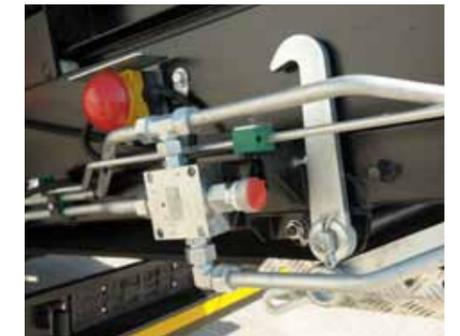

Sealing in the hopper prevents material from leaking to the inside of the machine

Replaceable drums with round or square holes and drum thickness according to customer requirements

Control panel with easy-to-use functions

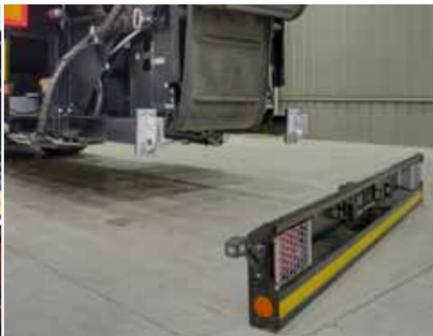

Belt speed adjustment - adjusts the speed to the type of screened material to maximize the performance. It also allows to stack more material of each fraction without the need of re-locating the machine

Quick and easy drum change

Detachable rear bumper

Hydraulic support legs improve machine stability on uneven ground

Central lubrication system ensures good greasing of the most important parts of the machine. Two sizes available

Homologation allows for moving screener on roads (up to 100km/h)

The engine and hydraulic system are mounted on a pull-out frame which provides easy access for maintenance

MOBILE TROMMEL SCREENS 

MPB 18.47g / 20.55g / 20.55gh MPB / 20.72g

Pronar offer of mobile trommel screens is complemented with tracks version models.

A totally autonomous drive system allows for trouble-free operations without additional towing machines required. The screens may be repositioned at any time thanks to the tracked chassis and can be used in hard to reach areas.

Remote control

Tracks pads prevent floor scratching

Hydraulic system for adjusting chassis position in MPB 20.55gh. The mechanism allows leveling machine on longitudinal slopes and increases the clearance for easier moving on uneven terrain

Rear conveyor folded by means of two hydraulic cylinders

Beacon light signalises work/drive mode

Conveyors retract to the outside of the machine - this allowed for lesser height

Tracked chassis for moving the machine without any additional towing vehicles

MPB 20.55 - soil

MPB 20.55g - soil

MPB 18.47 - coal

Air separator perfectly separates light materials from larger fraction - additional recovery of secondary raw materials such as foil or paper

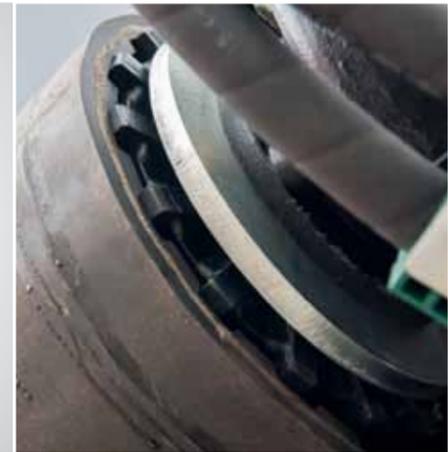

Magnetic roller for ferrous metals may be mounted on rear and side discharge conveyors

Hydraulic tipping grid for removing large objects - prevents damage to the trommel drum. Used for debris, gravel and stones

Remote controls for basic machine functions. Especially useful when using hopper tipping grid. Loader operator can remove the accumulated material directly from his cabin. Remotes also have the emergency stop button. (available 6- and 10-button versions)

Ribbed belt - special construction prevents slipping of the hopper belt when screening high-density materials i.e. gravel

Electric pump for easy refuelling

MPB 18.47 - biologically stabilized waste

MPB 18.47 - biologically stabilized waste

MPB 18.47 - gravel

Reliable Caterpillar or Deutz engines - thanks to the application of the latest environment-friendly technologies, the engine meets latest emissions standards

Optional electric motor allows a significant reduction of running costs and noise levels

Cleanfix systems - automatically clean engine and hydraulic system oil radiators

Hydraulic legs opened from main control or hand pump

MPB 18.47e - coal

MPB 20.55 - municipal waste

MPB 20.72 - wood chips

Additional 3 point lighting system of the working area increases safety near the screener

Steel side guards are more durable and resistant for impacts

Water and liquid soap tank available as optional equipment

Side-guards protection system stops the machine when side shields are opened by unauthorized personnel

Dolly-type trolley for moving MPB 20.72 with truck or tractor

Ball coupling enables repositioning of the trommel screen using construction machinery

MPB 14.44 / 18.47 / 20.55 / 20.72 / 18.47g / 20.55g / 20.55gh / 20.72g

Pronar MPB Trommel drums may be easily changed to suit material screening requirements.

Pronar also produces screen drums compatible with other manufacturers' machines.

Depending on the screened material: soil, compost, municipal waste, aggregate, biomass; different types of perforation are available, shapes include round or square, any size hole available.

There are 4 standard drum versions available:

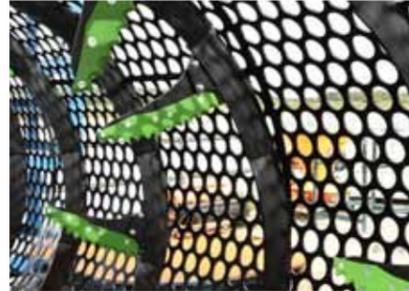

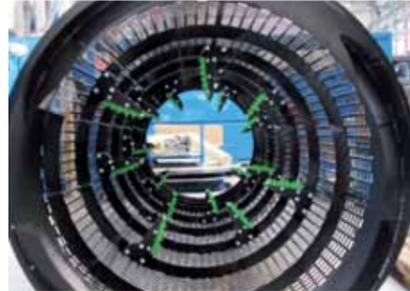

- length 4,4 m & diameter 1,4 m
- length 4,7 m & diameter 1,8 m
- length 5,5 m & diameter 2 m
- length 7,2 m & diameter 2 m

There are 3 standard wall thickness versions: 6 mm, 8 mm and 10 mm.

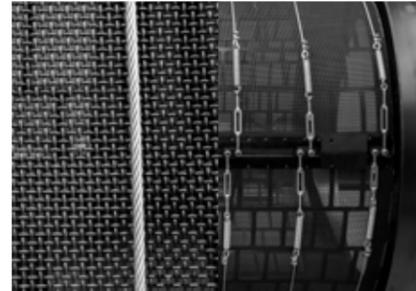

Hole size, regardless of its shape, could be from 10 to 100 mm.

Upon client's request, we are able to manufacture a drum of non-standard holes or made of steel mesh

Screwed knives for ripping bags with waste*

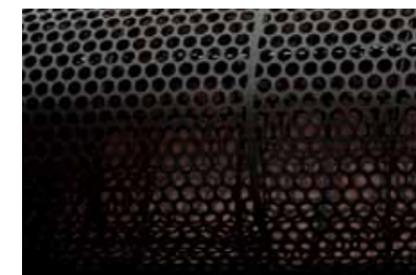

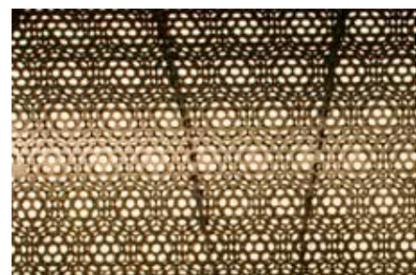

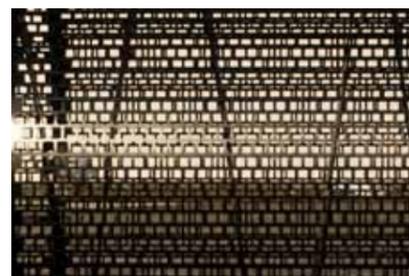

Special mesh drum for perforation <10mm

Drum length [mm]	Drum diameter [mm]	Available drum thickness [mm]	Perforation shape
4400	1400	6/8/10	square / round
4700	1800	6/8/10	square / round
5500	2000	6/8/10	square / round
7200	2000	6/8/10	square / round

Different types of perforation "K" - square

Different types of perforation "O"-round

Material spreading shaft

Starscreen can be used instead of trommel. Utilising starscreen during works on wet material increases machine efficiency. The rotation speed of the stars can be steplessly regulated which allows for accurate setting of the separated fraction

Destinated for:

- Municipal and industrial waste, compost,
- Shredder tree stumps, wood, bark,
- Contaminated aggregates: sand, gravel, clay, stones, soil, peat, coal,
- Materials for road or garden works

Available starscreens:

Model	Screening area
MPB 20.55	1,2 x 4,9 (5,72 m ²)
