FORESTLINE

Greentec 942 TRACK

- The quiet achiever, modest yet industrious
- Perfect for chipping big bunches of branches because of its higher placed anvil and integrated hydraulic motor in the infeed roller, eliminating the need for openings in the infeed channel
- The powerful top roller pulls in branches and heavy logs with ease
- The machine has a modern look, with all moving parts enclosed by easily opened covers

Knives easy accessible when the infeed rollers are hydraulically positioned above the machine

Wood crane optionally

Closed infeed chain optionally

Radio remote control, 2-inch colour display with optional foot control

Greentec 942 TRACK
