# ■ Greentec 952MEGA MOTOR

- The original classic in our range
- The all-round machine with an extra-large top infeed roller, is powered by two internal hydraulic motors, 500x1450mm wide
- This model is an excellent choice for processing whole trees and big tree canopies
- The drum has 4 knives with a 25mm overbite producing uniform wood chips
- The 952MEGA model is built for high productivity. Producing 100 to 150m<sup>3</sup> an hour with a powerful chip discharge

Built on crane Palfinger C45F84 with extra low pillar

80 km/h axes, supersingle tyres 435 wide

Wide infeed and fitted with standing rollers

Height and length adjustable drawbar, equipped with hydraulic drop leg

## Greentec 952MEGA

|  |              |
|--|--------------|
| Infeed opening incl. standing rollers (mm) | 600 x 1450   |
| Feed opening channel (mm)                  | 550 x 1060   |
| Max. infeed softwood (mm)                  | Ø 550        |
| Drum (mm)                                  | Ø 960 x 930  |
| Top roller (mm)                            | Ø 500 x 1060 |
| Bottom roller (mm)                         | Ø 300 x 1060 |
| Standing rollers (mm)                      | Ø 300 x 610  |
| Chipper knives                             | 4            |
| Max. chip length (mm)                      | 25           |

John Deere 425 HP Tier 4 Final / Stage 5 Capacity app. 150m<sup>3</sup>/hour
