

PORTABLE INDUSTRIAL VACUUM W/CONTAINER

*** SV 18-22 EC * - *SV18-22 EC-T-GS***

TECHNICAL DATAS :

Motor Power kW – Hp	18-25	22 - 30
Sizes mm	1350 x 1000 x H 1900	
Weight kg	900	950
Max Vacuum mm/H₂O	5000	
Max. Airflow m³/h	1.100	1200
Primary Filter surface m²	10	
Safety filter filtering surface m²	4	
Dust Capacity m³	0,5 (1 m ³ with T-GS version only)	

Portable industrial vacuum cleaner with integrated container, usable for heavy duty and transportable by fork lift (with minimum 2 ton capacity).

The container has a capacity of 500 liters and it can be unloaded from the bottom through a tilting door. The door is closed by lowering the unit to the ground. The unit is equipped with safety systems that prevent the container from being opened while the machine is in motion.

The filtering system is composed of polyester felt filter pockets with internal spacer, polyester safety cartridge to protect the pump, automatic timed system for filter cleaning by mechanical shaking. Inside the storage container there is the level probe which intervenes by stopping the machine when the container is full

The **SV EC** series, thanks to the **T-GS kit** (additional hopper, discharge valve, and support with telescopic legs), which can be requested separately, can bag the sucked dust directly into the **BIG-BAG**.

The machines are supplied as standard to work with a three-phase V 400 power supply, different power supplies must be indicated in the request and will be quoted separately. Power socket V. 400 A 63 complete with connection plug. The power cord is not supplied.

All models can be certified according to the European Directive **ATEX 2014/34/EU**.
